SAFEGUARDING CHILDREN

This conference is a milestone in the development of Bath Spa University's integrated Child Protection programme. We welcome the endorsement that Sir Roger Singleton (Chief Safeguarding Adviser to the Government) gave at our last conference in January.

This is the second in a series of conferences to trace the development of the programme and to give the opportunity to share our thinking about three new areas: Safeguarding Disabled Children, Child exploitation on the internet and Questioning Skills for Professionals talking with adults.

Our Safeguarding initiative is a collaborative effort between the University and the multi-agency community in the public, independent and voluntary sectors.

It is part of our commitment to developing their social care learning platform. Interest in the programme has developed across the wider children's workforce.

The new modules in the programme are the subject of this conference. Each will be introduced by a subject specialist and there will be opportunity for discussion with the specialist speakers. We hope that you will join us.
