BA (Hons) Contemporary Arts Practice	UG	Level 4 - Outling syllabus. 19 - Ethical and sustainable considerations relating to practice.	53	42	49		144	144
BA (Hons) Creative Arts	UG		**17**	**15**	**16**		48	
BA (Hons) Digital Animation	UG	NEW for 2018						
BA (Hons) Fashion Design	UG	You will have opportunities to engage critically with the social and ethical aspects to the production of clothes, such as lifecycle and sustainability. By embedding sustainability and ethics discussion and debate within design practice throughout the programme. This module includes contemporary debates and issues that pertain to fashion design practice and the creative industries more broadly. Moving beyond commercial success and aesthetic values we will explore, and reflect on the significance of, such issues as sustainability, ethical design practice, social enterprise and environmental practices in terms of how they impact on, and what they demand of fashion design. We will also consider local and global implications and contexts	27	18	23		68	68
BA (Hons) Fine Art	UG	By exploring wider ethical issues that have impact across contemporary fine art practice; exercising responsibility and consideration of others; taking part in international opportunities and projects; embedding sustainability and ethics into all projects Outline syllabus: This module considers contemporary debates and issues that pertain to fine arts practice and the creative industries more broadly. We will consider the ways in which contemporary art often engages with social and political concerns ranging from such issues as globalization and sustainability through to identity and gender. The institutional, economic and ethical frameworks in which contemporary arts practice is situated will also be considered.	49	51	42		142	142
BA (Hons) Furniture and Product Design	UG	**Level 5 sustainability module: FPD5000-20** This module will support a focused investigation into ethical and sustainability issues within furniture and product design. **Production in Furniture and Product Design: FPD4003-20** You will have opportunities to engage critically with the social and ethical aspects to production, such as lifecycle and sustainability, and the basics of manufacture logistics. The module is also an opportunity to further develop your technical skills, and projects are likely to include experience of technical drawing and prototyping. **Contemporary Issues and Practice: HAC5104-20** This module considers contemporary debates and issues that pertain to furniture and product design practice and the creative industries more broadly. Moving beyond commercial success and aesthetic values we will explore, and reflect on the significance of, such issues as sustainability, ethical design practice, social enterprise and environmental practices in terms of how they impact on, and what they demand of, design. We will also consider local and global implications and contexts.	8	6	4		18	18
BA (Hons) Graphic Communication	UG	This module considers contemporary debates and issues that pertain to graphic communication practice and the creative industries more broadly. Moving beyond commercial success and aesthetic values we will explore, and reflect on the significance of, such issues as sustainability, ethical design practice, social enterprise, environmental practices in terms of how they impact on, and what they demand of, design. We will also consider local and global implications and contexts.	46	61	47		154	154
BA (Hons) History of Art and Design	UG		9	13	4		26	
BA (Hons) Photography	UG	You'll develop a deeper awareness of social and ethical implications for the photographic industry. Outline syllabus: This module includes seminars, workshops and lectures by individual photographers and a range of industry professionals. Key seminar and workshop activities focus on: ● historical development of the photographic industry ● review and analysis of contemporary industry and professional bodies ● time planning and time recording ● consideration of ethical, social and environmental issues relating to the industry ● sustainability issue mapping for industry ● key skills in communication and IT, delivered through presentations (oral and written reporting) and assignments.	39	34	24		97	97
BA (Hons) Textile Design for Fashion and Interiors	UG	By exploring wider design issues that have impact at all levels; exercising responsibility and consideration of others; taking part in international opportunities and projects; embedding sustainability and ethics into textile briefs and context. Define, evidence and communicate a systematic understanding, including ethics and sustainability where appropriate, of the role of the contemporary textile designer and situate and apply this within a social context. Investigate, reflect and respond on the understanding, including ethics and sustainability, of the role of the contemporary textile designer and the context within which this is sited. Effectively employ an informed, inquisitive understanding, including practical and material enquiry, ethics and sustainability, to a determined textile practice and contextualise this practice within a social context. Moving beyond commercial success and aesthetic values we will explore, and reflect on the significance of, such issues as sustainability, ethical design practice, social enterprise and environmental practices in terms of how they impact on, and what they demand of, textile design. We will also consider local and global implications and contexts.	31	55	39		125	125
