

## **Interview task: Secondary Physical Education**

### **Aim**

We are able to gain some information about your subject knowledge from your degree title and the modules you studied within it, plus the other information on your GTTR form. This task aims to provide the university with some additional information about your subject knowledge and experiences in using it.

### **The task**

Choose any physical activity which you have either enjoyed or participated in and consider the following:

- ✓ What first aroused your interest in that particular activity and first got you actively involved in it
- ✓ What you think are the main benefits to be gained through taking part in that particular physical activity
- ✓ The benefits which you personally gained
- ✓ The reasons why you feel this is an important activity to be included in the physical education curriculum within a school
- ✓ Any actual experience you have gained in actually teaching or coaching this activity

Present this as a piece of written work that you will bring along to interview to be presented. You will be asked to talk briefly about it and after the interview it will be kept as part of the information needed on which to base the decision about your application.

This should consist of no more than one side of A4, i.e. about 500 words of typed text.
