Awarding institution	Bath Spa University
Teaching institution	Bath Spa University
School	School of Writing, Publishing and the Humanities
Department	Environmental Humanities
Main campus	Newton Park
Other sites of delivery	n/a
Other Schools involved in delivery	Education, Sciences
Name of award (s)	MA Environmental Humanities
Qualification (final award)	MA
Intermediate awards available	PgCert, PgDip
Routes available	Single

Duration of award	1 year full-time / 2 years part-time
Sandwich period	No
Modes of delivery offered	Campus-based
Regulatory Scheme <a href="#">[1]</a>	Taught Postgraduate Framework
Professional, Statutory and Regulatory Body accreditation	N/A
Date of most recent PSRB approval (month and year)	N/A
Renewal of PSRB approval due (month and year)	N/A
UCAS code	N/A
Route code (SITS)	EH7
Relevant QAA Subject Benchmark Statements (including date of publication)	There is no QAA Subject Benchmark statement for Environmental Humanities. However, the following are partially relevant to different aspects of the degree: Environmental Sciences and Environmental Studies (2015); Philosophy (2015) , English (2015); Anthropology (2015); Creative Writing (2016). Reference has also been made to the Masters' Degree Characteristics Statement (2015)
Date of most recent approval	5/7/2016
Date specification last updated	5/1/2023

[1] This should also be read in conjunction with the University's Qualifications Framework

## Programme Overview

The Environmental Humanities offer leading-edge interdisciplinary responses to today's complex and urgent environmental challenges, bringing knowledge and insights from the arts, humanities and social science into critical conversation with natural science understandings. Drawing on world-class expertise from across the Schools of Writing, Publishing and the Humanities, Sciences, and Education, Bath Spa's MA in Environmental Humanities addresses specific problems such as biodiversity loss and climate change, but also broader ideas about human relationships with place, technology and the more-than-human world. This programme is an opportunity to acquire new research skills, as you discover the challenges and rewards of integrating highly varied methodologies, resulting in more holistic forms of knowledge and understanding. Core modules taught by specialists offer intensive introductions to new disciplinary perspectives, while maintaining a critical focus on key ideas such as the proposition that Earth has now entered a new geological era, the Anthropocene, in which human activities are altering the planet in ways that will leave their mark for millennia.

The programme is designed for flexibility, offering a palette of elective modules that will also enable you both to learn new approaches and to consolidate your expertise in a particular discipline such as history, geography, anthropology, literary studies, philosophy, ethics and religion, environmental studies, or conservation. A significant research project or creative practice component makes this a personally as well as intellectually transformative course which is very much yours to mould to your own needs through module and dissertation choices. Multidisciplinary and interdisciplinary research methods training will enable you to continue on to doctoral studies in either the humanities or social sciences, and your major project can take the form of either an academic dissertation or a creative work. However you shape it, you can be confident that given the growing demand for graduates with cross-disciplinary skills and understanding, your MA in Environmental Humanities will provide a solid basis from which to contribute to the 'green' society and economy of the 21st century.

## Programme Aims

The overall aim of this programme is to enable students to bring knowledge and insights from the arts, humanities and social sciences into critical conversation with the natural sciences in order to better understand and address today's complex environmental problems in their wider cultural context. In this programme you will study:

1 How social and cultural factors shape human relations with other living beings and more-than-human environments, and vice versa;

2 Key concepts that have been developed within the Environmental Humanities to analyse such interrelationships;

3 Ecologically oriented approaches across a range of disciplines in the humanities and social sciences;

4 Ways of bringing together different kinds of knowledge (e.g. ecological, literary, anthropological, philosophical, geographical, but also traditional and indigenous) in order to address today's complex socio-environmental problems.

## **Programme Intended Learning Outcomes (ILOs)**

**(NB These ILOs are at level 7 of the FHEQ)**

### A Subject-specific Skills and Knowledge

- A1 An enhanced understanding of the interrelationship between 'culture' and 'nature';
- A2 Critical awareness of the problems arising from the separation of 'nature' and 'culture' as separate domains and objects of knowledge;
- A3 Knowledge of core concepts in the Environmental Humanities that illuminate such natural-cultural interrelationships (e.g. 'anthropocentrism', 'Anthropocene', 'environmental ethics', 'environmental racism'; 'trans-species justice'; 'ecopoetics'; 'biosemiotics');
- A4 Familiarity with a range of ecologically-oriented approaches to researching environmental issues in different disciplines across the arts, humanities and social sciences (e.g. 'ecocriticism', 'ecophilosophy', 'environmental history', 'multispecies ethnography');
- A5 Skills in the application of interdisciplinary methods to address complex socio-environmental issues (e.g. climate change, biodiversity loss, and disaster preparedness and risk reduction);
- A6 An enhanced capacity to engage critically and creatively with such issues in order to help foster more ecologically-attuned and socially inclusive attitudes, values and practices

### B Cognitive and Intellectual Skills

- B1 The ability to: reflect critically on how different ways of knowing, communicating and acting shape our view of reality;
- B2 Engage with complex problems both systematically and creatively;
- B3 Present your work in a written form that accords with the norms of evidence and conventions of presentation in the humanities and/or social science OR in the form of a creative work that accords with the criteria of excellence in the relevant medium;
- B4 Self-direction and originality in formulating, planning and investigating a research topic, which could form the foundation for doctoral study or employment in a profession demanding advanced skills of critical analysis, creative thinking, and oral and written argumentation.

### C Skills for Life and Work

C1 Autonomous learning (including time management) that demonstrates the exercise of initiative, personal responsibility and decision-making in complex and unpredictable situations and the independent learning ability required for continuing professional development

C2 Team working skills necessary to succeed in the global workplace, with an ability both to work in and lead teams effectively, as well as the ability to act autonomously in planning and implementing tasks at a professional or equivalent level

C3 Communication skills that show the ability to communicate clearly to specialist and non-specialist audiences knowledge at, or informed by, the forefront of the academic discipline, field of study or area of professional practice, and the conclusions drawn from dealing with complex issues systematically

C4 IT skills and digital literacy that demonstrate the ability to develop new skills to a high level and to approach complex issues systematically and creatively

### **Intermediate awards**

**PgCert Intended Learning Outcomes (= successful completion of EH7001 and EH7009 or an approved optional module)**

Intended Learning Outcomes

A1, 2, 3, 4, 6

B1, 2, 4

C1, 3, 4

**PgDip Intended Learning Outcomes.(= successful completion of EH7001 and EH7009 plus 60 credit points of optional modules)**

Intended Learning Outcomes

A1, 2, 3, 4, 6

B1, 2, 4

C1, 3, 4

## Programme content

This programme comprises the following modules

Key:

Core = C

Required = R

Required\* = R\*

Optional = O(NB Some of these might have prerequisites and not all will be available every year).

Not available for this status = N/A

If a particular status is greyed out, it is not offered for this programme.

Subject offered as single and/or joint programme

MA Environmental Humanities				Status	
Level	Code	Title	Credits	Single	Trimester
7	EH7001-30	Environmental Humanities: Issues and Approaches	30	C	1
7	EH7009-30	Interdisciplinary Research Methods for the Environmental Humanities	30	C	2
7	EH7005-60	Environmental Humanities: Dissertation	60	R*	3
7	EH7006-60	Environmental Humanities: Creative Project	60	R*	3
7	EH7003-30	Environmental Ethics and Philosophy	30	O	1
7	EH7007-30	Environmental Writing and Ecocriticism	30	O	2
7	EH7008-30	Cultural Landscapes	30	O	2
7	EH7004-30	Managing Sustainability	30	O	2
7	EDU7129-30	Perspectives on Play and Creativity	30	O	2
7	CW7011-30	Writing and the Environment	30	O	1
7	CW7014-30	The Writer and Place	30	O	2
7	HT7010-30	Contextualising Heritage	30	O	1

## Assessment methods

A range of summative assessment tasks will be used to test the Intended Learning Outcomes in each module. These are indicated in the attached assessment map which shows which tasks are used in which modules.

Students will be supported in their development towards summative assessment by appropriate formative exercises.

Please note: if you choose an optional module from outside this programme, you may be required to undertake a summative assessment task that does not appear in the assessment grid here in order to pass that module.

## Work experience and placement opportunities

Whilst this course does not currently include a formal workplace experience module, it may be possible for students to connect with environmental organisations such as the National Trust, RSPB, Avon Wildlife Trusts, or social enterprises, such as EcoWild, in relation to their dissertation/creative project. Staff delivering the programme will also make students aware of their own relevant external links and networks, and draw on these as appropriate.

Career opportunities for graduates with an MA in Environmental Humanities include working in socio-environmental research and education; local, national and international conservation organisations; environmental film, TV, and other media; environmental journalism, art and creative writing; eco-tourism; private companies with a strong sustainability agenda; and local, national and international governmental agencies concerned with conservation, climate change, and sustainable development.

## Additional Costs Table

There are no additional costs associated with this course.

Module Code & Title	Type of Cost	Cost

## Graduate Attributes

	Bath Spa Graduates...	In Environmental Humanities , we enable this...
1	Will be employable: equipped with the skills necessary to flourish in the global workplace, able to work in and lead teams	Students of the MAEH will be well placed to participate in the global workplace as it moves onto a more environmentally sustainable footing in the wake of the Paris COP21 agreement and release of the UN's new Sustainable Development Goals. In addition, they will have opportunities to work in and lead teams, throughout the course, through the student led seminars in the introductory Ideas and Issues module and in the dissertation or creative project module.
2	Will be able to understand and manage complexity, diversity and change	The acquisition of advance analytical skills taught throughout the programme which can be applied to understanding and managing complexity and change both inside. and outside of academe.
3	Will be creative: able to innovate and to solve problems by working across disciplines as professional or artistic practitioners	The exploration of interdisciplinary methodologies in both the introductory and the interdisciplinary research methods core units in order to find creative solutions to complex socio environmental problems. These include intersections between artistic practice (notably creative writing and film-making) and conservation biology, with the possibility of suitability qualified students to take electives in creative writing as well as producing a creative work for their major project.
4	Will be digitally literate: able to work at the interface of creativity and technology	Digital Literacy will be embedded in all modules, most explicitly in the core methods modules, where students encounter advanced research skills in digital humanities

5	Will be internationally networked: either by studying abroad for part of the their programme, or studying alongside students from overseas	It is anticipated that this programme will attract students from abroad, and international content will be embedded in several of the modules. (e.g. case studies from Africa, India and Australia in the interdisciplinary methods module and research from around the world in the introductory Ideas and Issues module.)
6	Will be creative thinkers, doers and makers	The independent dissertation or project requires high levels of creative thinking and problem-solving.
7	Will be critical thinkers: able to express their ideas in written and oral form, and possessing information literacy	The whole programme, especially but not exclusively in the independent dissertation or project, requires high levels of critical thinking, based on the extensive research involving information literacy.
8	Will be ethically aware: prepared for citizenship in a local, national and global context	The programme has a strong focus on the ethical dimensions of human interaction with non human others and the environment. In the introductory Ideas and Issues and Interdisciplinary Method modules this includes consideration of inter - or trans species justice, as well as the interrelationship between social injustice and both environmental degradation and conservation (e.g. when indigenous people are alienated from their traditional lands to create national parks.) This awareness of the ethical complexities of socio-environmental change affords important preparation for citizenship, locally, nationally and globally, enabling graduates to play a role in the transition to a more equitable, peaceful and ecologically - attuned world.

## Modifications

### Module-level modifications

Code	Title	Nature of modification	Date(s) of approval and approving bodies	Date modification comes into effect
EH 700 4-30	Managing Sustainability	Assessment change	approved by Humanities SQMC 30th November	2021/22
CW 7506	Context, History & Genres in Creative Non-fiction)	Semester change	approved by Creative Industries SQMC 30th November 2020	2021/22
CW 750 2-30	Advanced Travel and Nature Writing	Semester change	approved by Creative Industries SQMC 30th November 2020	2021/22
