

**Definitive Programme Document: Environment, Politics, and Philosophy
(Bachelor's with Honours)**

Awarding institution	Bath Spa University
Teaching institution	Bath Spa University
School	Humanities
Main campus	Newton Park
Other sites of delivery	n/a
Other Schools involved in delivery	All
Name of award(s)	Environment, Politics and Philosophy
Qualification (final award)	BA(Hons)
Intermediate awards available	CertHE, DipHE
Routes available	Single
Sandwich year	Optional
Duration of award	3 years full-time 4 years with optional Placement Year
Modes of delivery offered	Campus-based
Regulatory Scheme ¹	Undergraduate Academic Framework
Exemptions from regulations/framework ²	No
Professional, Statutory and Regulatory Body accreditation	None
Date of most recent PSRB approval (month and year)	None
Renewal of PSRB approval due (month and year)	None
UCAS code	NPP1/NPP2
Route code (SITS)	BAEPP/BAEPP-SW
Relevant QAA Subject Benchmark Statements (including date of publication)	Earth Sciences, Environmental Sciences and Environmental Studies, December 2019 [NB: related to Environmental Studies ONLY] Geography, December 2019 Philosophy, December 2019 Politics and International Relations, December 2019 English, December 2019 History, December 2019
Date of most recent approval	March 2021
Date specification last updated	n/a

¹ This should also be read in conjunction with the University's Qualifications Framework

² No exemptions

Programme Overview

BA Environment, Politics and Philosophy is offered as one of the University's suite of courses in Applied Humanities. It has been designed to enable you to acquire specialised subject knowledge, develop practical and professional skills and apply both to current challenges, issues and debates.

We know that we face acute environmental challenges, and that we can't postpone changing the ways in which we think and act if we are to address these. We also know that environmental science, on its own, won't be able to do this – that solutions lie in understanding how we think, how we respond emotionally to the world around us, and how we see ourselves within it.

This course is especially designed to enable you to apply your broad understanding of political and philosophical ideas to current environmental challenges and dilemmas. It poses fundamental questions about how we live and work in the present, and seeks to answer some of these through the development of your skills in critical thinking, project design and implementation, advocacy and communication. Drawing on a wide range of subjects and disciplines in the Humanities, Sciences, and Social Sciences, this course places the environment at the heart of what you'll study, as well as forming the basis for the practical projects you might undertake.

Above all, you'll be able to work on a series of projects which look out from the University and into the city and region – or further afield, in some instances. We want you to be able to develop demonstrable skills and experience, which may include leading a project team, evaluating and acting on alternative responses to a defined challenge, or pitching an idea to one of our many partner organisations, and wherever possible following this through to implementation.

Programme Aims

1. To explore the social, cultural and political factors that shape human relations with other living beings and more-than-human environments, and vice versa;
2. To combine ecologically-oriented approaches across a range of disciplines in the humanities, social sciences, and sciences, in order to understand today's complex environmental challenges;
3. To locate the study of humanity's relationship with the environment in broader cultural, intellectual and political contexts, and to make connections between cognate areas of study;
4. To create opportunities in which academic skills, knowledge and experience can be applied to practical projects, and then enhanced through the further development of professional practice, techniques and approaches;
5. To encourage flexible, sceptical and enquiring approaches to learning, independence of thought, creativity and collaboration

6. To combine respect, sensitivity and empathy with the rigorous analysis of different cultures, systems and perspectives.

Programme Intended Learning Outcomes (ILOs)

A Subject-Specific Skills and Knowledge

	Programme Intended Learning Outcomes (ILOs) On Achieving Level 6	On Achieving Level 5	On Achieving Level 4
A1	<i>Approaches, methods, and theories</i> Coherent understanding of the complexity of interdisciplinary enquiry, argument and analysis in the study of the environment and the social-cultural impacts of environmental change	<i>Approaches, methods and theories</i> Critical engagement with the different approaches, methods and theories used in the study of the environment and the social-cultural impacts of environmental change	<i>Approaches, methods and theories</i> Knowledge of different approaches, methods and theories used in the study of the environment and the cultural-social impacts of environmental change
A2	<i>Connections and change</i> Critical evaluation and interpretation of change in human and physical environments, and of the complex relationships between planning, politics and policy in the management of change	<i>Connections and change</i> Critical understanding of the relationships between individuals, communities, and organisations in addressing questions of environmental, cultural and social change	<i>Connections and change</i> Knowledge of the interactions between individuals, communities, and organisations in addressing questions of environmental, cultural and social change
A3	<i>Culture and politics</i> Critical participation in cultural and political debates relating to the environment, people in the environment and environmental sustainability	<i>Culture and politics</i> Critical evaluation of the cultural and political debates around values and meanings in the context of the environment, sustainability and political agency	<i>Culture and politics</i> Knowledge of cultural and political debates around the values and meanings of key concepts related to the environment and sustainable societies

A4	<i>Ethical thinking</i> Critical engagement with the role of ethics in contemporary environmental politics and policy, and the analysis of the ways in which ethical considerations are used to support or challenge past and present actions or inaction	<i>Ethical thinking</i> The identification and application of ethical and political approaches and concepts in the study of environmental issues in their local, national and global contexts	<i>Ethical thinking</i> Knowledge of a range of ethical and political approaches and concepts to the study of environmental issues in their local, national and global contexts
A5	<i>Perspectives and position</i> Critical reflection on the interplay between diverse perspectives and positions in the formulation of responses to contemporary social, cultural and political events	<i>Perspectives and position</i> Critical engagement with diverse perspectives and positions, including one's own, in the analysis and interpretation of contested aspects of historical and contemporary social, political and cultural events	<i>Perspectives and position</i> An understanding of different perspectives in the description of contested aspects of historical and contemporary social, political and cultural events
A6	<i>Evidence and ideas</i> Critical engagement with and reflection on the roles of evidence and ideas in the formulation of local, regional and global responses to environmental crisis	<i>Evidence and ideas</i> Critical analysis of the concepts, sources and arguments drawn from specific local, regional and global cultural contexts and their role in the examination of environmental issues	<i>Evidence and ideas</i> Knowledge and understanding of concepts, sources and arguments used in examining environmental issues, drawn from different, global perspectives

B Cognitive and Intellectual Skills

	Programme Intended Learning Outcomes (ILOs)	On Achieving Level 5	On Achieving Level 4
	On Achieving Level 6		
B1	<i>Application</i> Critical engagement with and reflection on	<i>Application</i> The application of critical approaches to	<i>Application</i> Knowledge and understanding of critical

	contemporary responses to environmental, political, and philosophical problems, debates and challenges	contemporary environmental, political, and philosophical problems, debates and challenges	approaches to contemporary environmental, political, and philosophical problems
B2	<i>Creativity</i> Problem solving through the critical analysis of and critical engagement with the complex issues, ideas and challenges inherent in environmental debate, discourse and action	<i>Creativity</i> Analysis of the complex issues, ideas and potential solutions inherent in and emerging from environmental debates and discourse	<i>Creativity</i> Understanding of the complex issues inherent in environmental debates
B3	<i>Argument</i> Critical engagement with sources, methods and approaches in the context of environmental change and political, philosophical and cultural responses to it	<i>Argument</i> Identification, selection and use of a range of sources, methods and approaches in the construction of argument and counter-argument	<i>Argument</i> Use of a range of sources in debate and discussion
B4	<i>Project planning and management</i> The initiation, design, implementation and critical evaluation of sustained and substantial projects	<i>Project planning and management</i> The initiation, planning and implementation of defined projects	<i>Project planning and management</i> The planning and implementation of defined projects

C Skills for Life and Work

	Programme Intended Learning Outcomes (ILOs) On Achieving Level 6	On Achieving Level 5	On Achieving Level 4
--	---	-----------------------------	-----------------------------

C1	<i>Autonomous learning</i> ³ (including time management) that shows the exercise of initiative and personal responsibility and enables decision-making in complex and unpredictable contexts.	<i>Autonomous learning</i> (including time management) as would be necessary for employment requiring the exercise of personal responsibility and decision-making such that significant responsibility within organisations could be assumed.	<i>Autonomous learning</i> (including time management) as would be necessary for employment requiring the exercise of personal responsibility.
C2	<i>Team working skills</i> necessary to flourish in the global workplace with an ability both to work in and lead teams effectively.	<i>Team work</i> as would be necessary for employment requiring the exercise of personal responsibility and decision-making for effective work with others such that significant responsibility within organisations could be assumed.	<i>Team work</i> as would be necessary for employment requiring the exercise of personal responsibility for effective work with others.
C3	<i>Communication skills</i> that ensure information, ideas, problems and solutions are communicated effectively and clearly to both specialist and non-specialist audiences.	<i>Communication skills</i> commensurate with the effective communication of information, arguments and analysis in a variety of forms to specialist and non-specialist audiences in which key techniques of the discipline are deployed effectively.	<i>Communication skills</i> that demonstrate an ability to communicate outcomes accurately and reliably and with structured and coherent arguments.
C4	<i>IT skills and digital literacy</i> that demonstrate core competences and are commensurate with an ability to work at the interface of creativity and new technologies.	<i>IT skills and digital literacy</i> that demonstrate the development of existing skills and the acquisition of new competences.	<i>IT skills and digital literacy</i> that provide a platform from which further training can be undertaken to enable development of new skills within a structured and managed environment.

³ i.e. the ability to review, direct and manage one's own workload

Programme content

This programme comprises the following modules

Key:

Core = C

Required = R

Required* = R*

Optional = O

Not available for this status = N/A

If a particular status is greyed out, it is not offered for this programme.

Assessment methods

A range of summative assessment tasks will be used to test the Intended Learning Outcomes in each module. These are indicated in the attached assessment map which shows which tasks are used in which modules.

Students will be supported in their development towards summative assessment by appropriate formative exercises.

Please note: if you choose an optional module from outside this programme, you may be required to undertake a summative assessment task that does not appear in the assessment grid here in order to pass that module.

Work experience and placement opportunities

As this is an applied course, there are opportunities throughout to *use* your knowledge, analysis and skills in a variety of different ways, including through project-related work inside and outside the University. The following modules have been explicitly designed to incorporate professional development, opportunities for working with external partners and placements of varying lengths and complexity. The University will support you in making the most of these opportunities, and in ensuring that they work for you in relation to the skills you want to develop, your ambitions and aspirations, and the needs of those with whom we work.

- POL5004-20 The Art of Persuasion: advocacy for change
- PET5102-20 Working Together
- PPY5100-120 Professional Placement Year
- POL6***-40 Environment, Politics and Philosophy Project

Graduate Attributes

	Bath Spa Graduates...	In Environment, Politics and Philosophy, we enable this by ...
1	Will be employable: equipped with the skills necessary to flourish in the global workplace, able to work in and lead teams	Providing opportunities to work with partners outside the University, applying subject knowledge and insight to a wide range of projects and tasks

2	Will be able to understand and manage complexity, diversity and change	Investigating the processes of change through our research and in our programmes, exploring complexity and valuing diversity
3	Will be creative: able to innovate and to solve problems by working across disciplines as professional or artistic practitioners	Valuing creativity in all the Humanities subjects, enabling problem solving, and facilitating work across disciplines
4	Will be digitally literate: able to work at the interface of creativity and technology	Embedding digital materials and approaches in our research, learning and teaching
5	Will be internationally networked: either by studying abroad for part of their programme, or studying alongside students from overseas	Offering a curriculum which crosses continents, explores different perspectives, and acknowledges our own
6	Will be creative thinkers, doers and makers	Providing opportunities to work in a variety of different ways, on a wide range of projects and with a mix of partners
7	Will be critical thinkers: able to express their ideas in written and oral form, and possessing information literacy	Embedding critical thinking in everything we do, challenging conventional thinking and promoting effective communication, in a variety of formats
8	Will be ethically aware: prepared for citizenship in a local, national and global context	Understanding our ethical responsibilities and how we can make a difference where we are
