Programme Overview

The study of Religions, Philosophies and Ethics enables you to explore diverse responses to fundamental questions such as what does it mean to be human, what is truth and how ought one think and act? It provides opportunities to examine radically different ways of interpreting and living in the world and encourages you to reflect on your own beliefs, values and identity. It also offers opportunities to understand and assess ethical standards, theories and their implications.

This is a cohesive and carefully constructed programme that balances the three elements of religion, philosophy and ethics and is distinctive in its emphasis on the global, contemporary and applied. Religions, philosophies and ethics are examined from a global perspective, encompassing a range of religious traditions, faiths and movements, and philosophical and ethical systems from across the globe.

There is a focus on living and new religions and on applying religious, philosophical and ethical knowledge and skills to contemporary contexts and issues. There is also an emphasis on experiential learning through fieldwork or observational research in a religious or belief-based community, and using this research to gain insight 'real world' concerns, such as ecology, gender and warfare.

Above all, you'll be able to work on a series of projects which look out from the University and into the city and region – or further afield, in some instances. We want you to be able to develop demonstrable skills and experience, which may include leading a project team, evaluating and acting on alternative responses to a defined challenge, or pitching an idea to one of our many partner organisations, and wherever possible following this through to implementation.

Programme Aims

1. To explore and apply a range of philosophical, religious and spiritual concepts and traditions that have an impact in and on the contemporary world
2. To reflect on assumptions about truth and meaning, beliefs and values, critically examining presuppositions and exploring unfamiliar methods of thinking
3. To enable you to locate the study of philosophies, religions and ethics and their conventions in broader cultural, intellectual and political contexts, and to make connections between cognate areas of study;
4. To create opportunities in which academic skills, knowledge and experience can be applied to practical projects, and then enhanced through the further development of professional practice, techniques and approaches;
5. To encourage a flexible, sceptical and enquiring mode of thought that is self-reliant but works creatively and collaboratively in co-operation and debate with others;
6. To inculcate attitudes of respect, sensitivity and empathy in the rigorous analysis of different cultures, belief systems and perspectives.

Assessment methods

A range of summative assessment tasks will be used to test the Intended Learning Outcomes in each module. These are indicated in the attached assessment map which shows which tasks are used in which modules.

Students will be supported in their development towards summative assessment by appropriate formative exercises.

Please note: if you choose an optional module from outside this programme, you may be required to undertake a summative assessment task that does not appear in the assessment grid here in order to pass that module.

Work experience and placement opportunities

As an applied course, there are opportunities throughout to *use* and *reflect* on your subject knowledge, analysis and skills in a variety of different ways, including through project-related work inside and outside the University. The following modules have been explicitly designed to incorporate professional development (including collaborating with your peers who specialise in other subjects within the School of Humanities), opportunities for working with external partners, and placements of varying lengths and complexity. Your tutors and the University will support you in making the most of these opportunities, and in ensuring that they work for you in relation to the skills you want to develop, your ambitions and aspirations, and the needs of those with whom we work.

- ENG4108-20 Thinking Together: Humanities in the 21st Century
- PET5102-20 Working Together: Applying Humanities
- RPE5103-20 Transformative Communities
- PPY5100-120 Professional Placement Year
- RPE6100-40 Religions, Philosophies & Ethics Project
- HUM6000-20 The Placement: Putting your subject into practice

The option of non-dissertation project in the **Level 6 Final Project module** has been designed as a culminating, 'capstone' project that allows you to develop an idea for an event, product, or service in any sector of work and industry. You will be supported by your supervisor and the Careers team in designing your project at the end of your second year so that you can develop your ideas and contacts over the intervening summer break. The final project is a negotiated assessment that you design and agree in collaboration with your academic supervisor.

You also have the option of taking a placement module (HUM6000-20 The Placement) in your third year, which can be used to complement your Project topic.

You can also opt for the one-year **Professional Placement Year** module (PPY5100-120), which you take between Levels 5 and 6. This alternative 'Sandwich' degree programme is studied over 4 years including a year-long work placement in a sector of your choice. During this time, you will be able to utilise knowledge gained as part of your studies in a real work environment to gain 'hands on' experience. The University's Careers and Employability team will assist you in finding and preparing for a placement. Following your placement year, you will return to University to complete your final year of study (Level 6).
